

MODULE 1

GETTING YOUR PITCH PERFECT

the workbook

MODULE 1

GETTING YOUR PITCH PERFECT

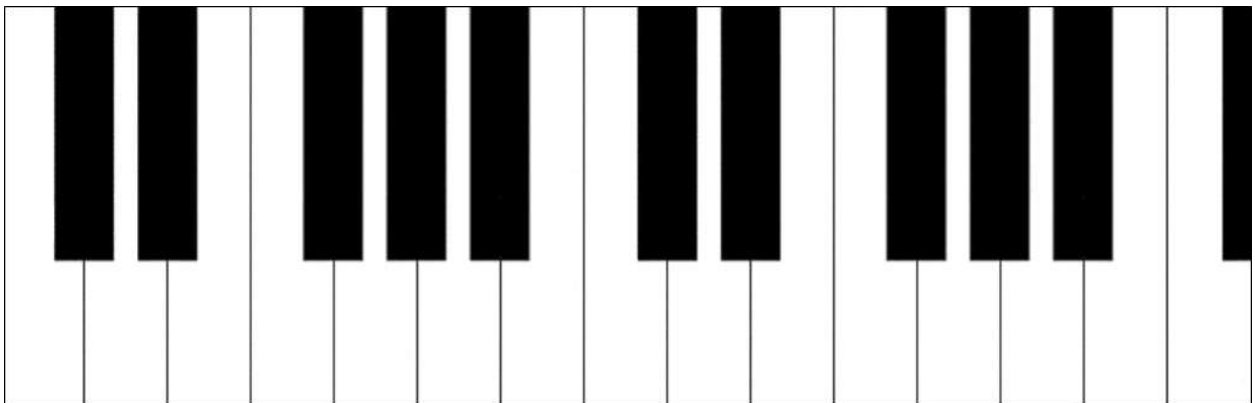

This module is all about getting to know the pitches and how they are represented by the white and black keys on the piano. The purpose of this module is to help you to know all of them at your fingertips.

1. What is pitch?

2. How many white and black keys are there in an octave?

3. What is a semitone and a tone?

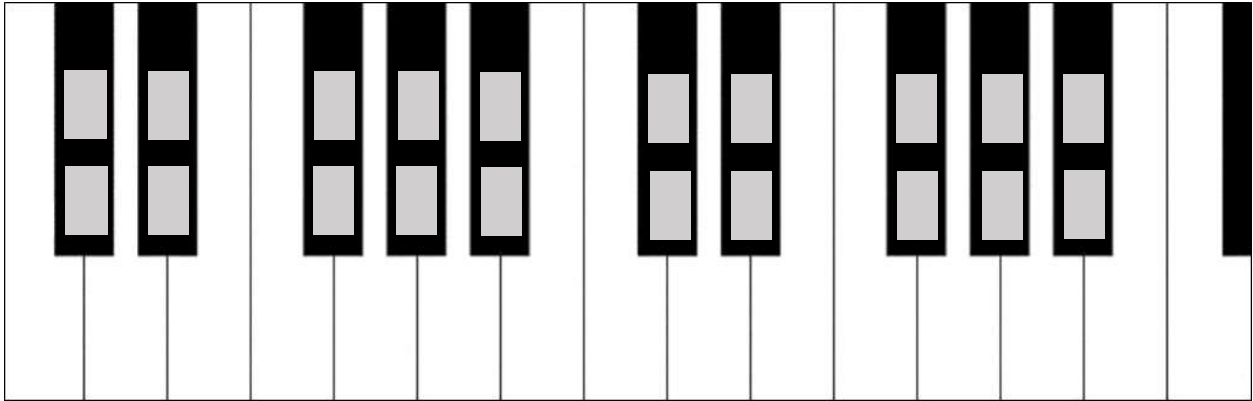

4. Identify the 2 islands in the piano layout below and name all of the white keys.

MODULE 1

GETTING YOUR PITCH PERFECT

5. Now, write down all of the white keys and start naming all of the black keys.
Increase in a semitone would mean a sharp is to be added to the key, decreased in a semitone means a flat is to be added to the key.

6. Fantastic! Now, go to your piano or piano keyboard and test yourself with the real thing. Poke around and have fun!

You may or may not remember all of the keys now, but don't worry, the more you play the piano, the more you'll remember and know all the keys naturally. Just like typing on the keyboard. ;-)
